

Free Members-only training

Trauma Basics for Providers September 17, 2021 9am – 12:45pm

Due date to register: Sept. 10, 2021

CEU Hours: TBD - estimated 3 - 3.5 hours (must attend full session to earn CEUs)

Instructors: Sandra Gormon-Brown, LICSW and Lori Eastep, LICSW

Description: An overview of the impact of trauma on brain development, function and behavior and how providers can offer a trauma sensitive, best practice approach to service delivery.

Upon completion, participants will understand the following:

- The Biology of Adversity - Three levels of stress
- ACE Findings - Correlation between dose and response
- Brain 101 - The Upstairs Brain vs the Downstairs Brain and the Neurosequential Model of Brain Development
- Impact of trauma on growth and development - PTSD basics
- Understanding and addressing misbehavior
- Self-care

This training will provide Continuing Education Credits and will be available on a first come-first served basis. In the event the course is full, we will limit attendees to two per member.
